

Get Started with Jumpix

With Jumpix, you get all your cloud storage accounts in one portal. No need to login to multiple times to access your files.

One Portal for all your
Cloud Content

Collective. Cloud. Content.

CONNECT

Jumpix allows you to connect and access all your cloud services in one place.

[Learn how to connect >](#)

COPY

Effortlessly copy your files from one service to another.

[Learn how to copy files >](#)

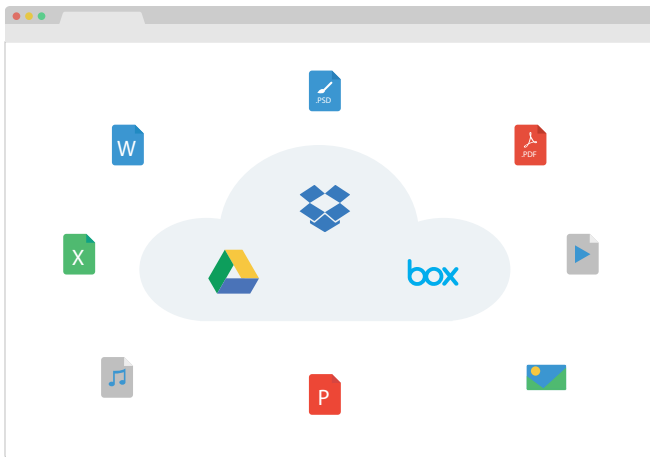

DELETE

Delete your files from your cloud storage instantly from Jumpix.

CONNECT

If you are like most people, you have multiple cloud services that contain different files. Use Jumpix in order to connect with all of your services at once in one safe and secure place.

Here's how to CONNECT

Add a Service

Select your cloud service (Box, Dropbox, or Google Drive).

Add New Services:

Select your cloud service.

Box

Dropbox

Google Drive

Close

Give your account a Nickname

With Jumpix, you are able to give each account a nickname you may prefer.

Here's how to CONNECT (continued)

Add New Dropbox Account:

Please make sure you have logged out of all your Dropbox accounts before clicking "Add Dropbox Account". We will take you to Dropbox to login and this way we do not store any passwords on Jumpix ever.

Give your account a Nickname.

Name: *

Add Dropbox AccountCancel

Login to your service

After you have given your account a nickname, you will be redirected to their login. Use the login information for that service to add the account (Box, Dropbox, Google Drive) to Jumpix. Your login information is never stored in Jumpix.

Here's how to CONNECT (continued)

Please remember to make sure you are logged out of your accounts before proceeding.

If you don't log out of your accounts, your browser will auto-connect with whatever dropbox, box or google account is currently logged in. This may or may not be what you want. This is especially true if you are trying to connect multiple accounts of the same cloud providers.

Sign in to Dropbox to link with
Jumpix.com

Give Jumpix access to your cloud service

In order to view your files and folders on Jumpix.com, you must allow Jumpix to access them.

Jumpix.com would like access to the files and folders in
your Dropbox.

Allow

COPY

Want to copy your files from Google Drive to Dropbox or Box?
With Jumpix you are able to copy any file on one cloud to another.

project

folder

project

Here's how to COPY

Select Files

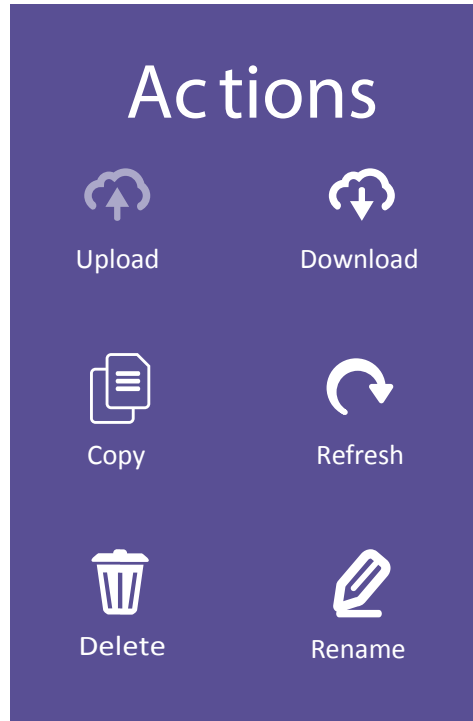

Select the files you want to copy over to your other cloud service.

Dashboard /  vsantos		
☐	Name ↕	
☐		GD207_AdvImgManip-SU11-Syl-7-5-12.pdf
☐		Getting Started.pdf
☐		Gina Batie's Resume.pdf
☐		Sarah final mail-1.pdf

Select Copy Action

Once you have selected the files, click on Copy on the Actions sidebar.

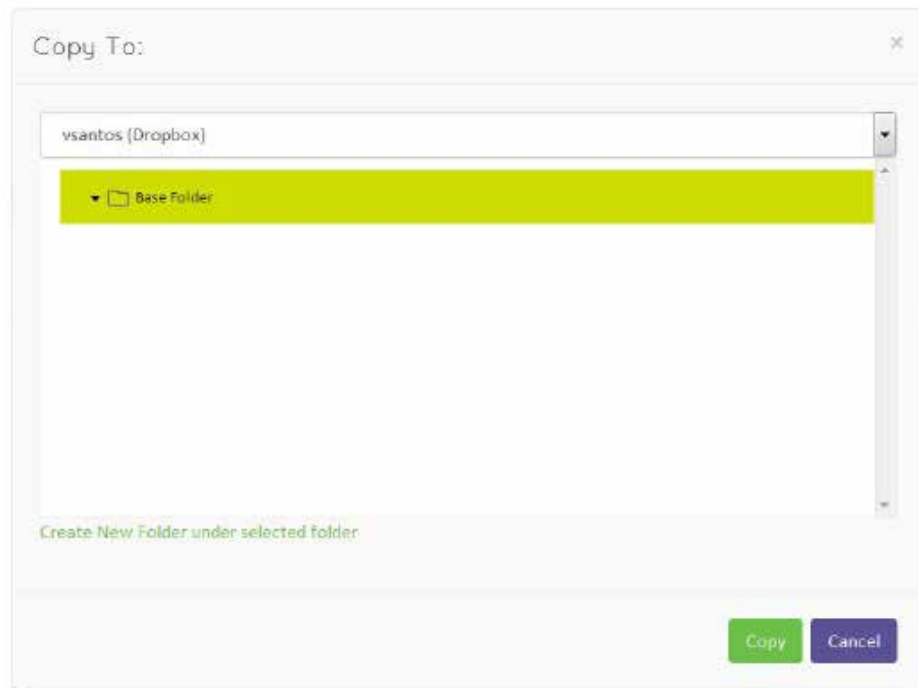

Here's how to COPY (continued)

Select Destination Account

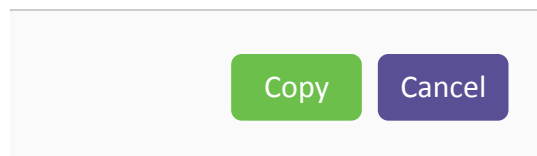

Once you have clicked the Copy action, you must choose the destination account and/or folder you would like to copy the files in. You have the choice to create a new folder in the chosen account.

Here's how to COPY (continued)

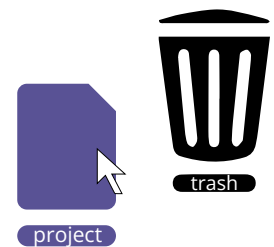

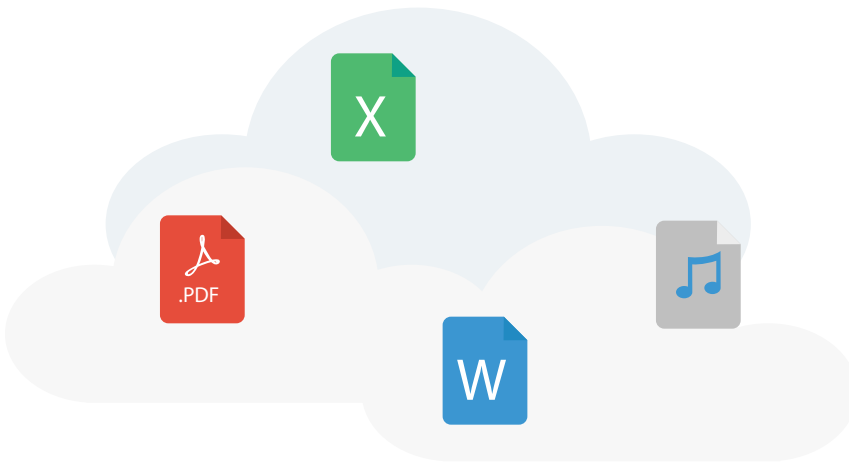

Finalize Action

Once you have chosen your destination, click the Copy button below to copy your file!

DELETE

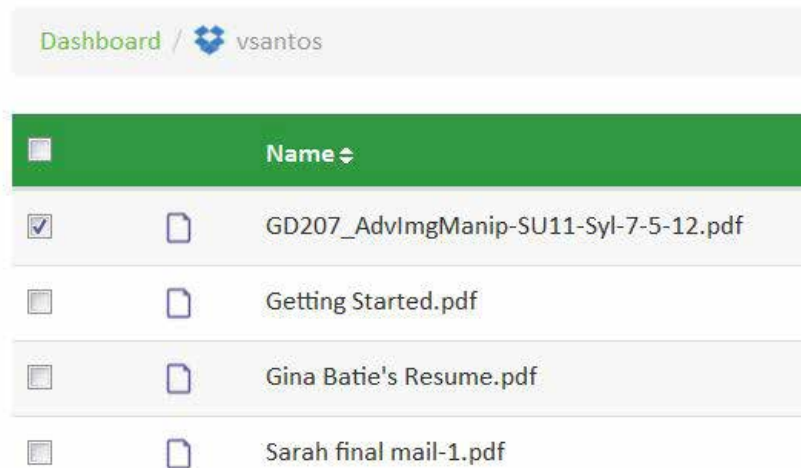

With Jumpix, you are able to delete those unwanted files from any of your accounts in one single place.

Here's how to DELETE

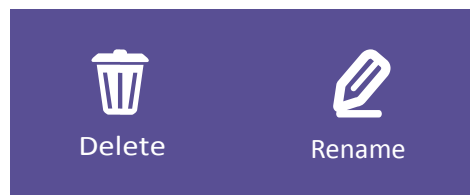

Select Files

Select the files you want delete from your cloud service.

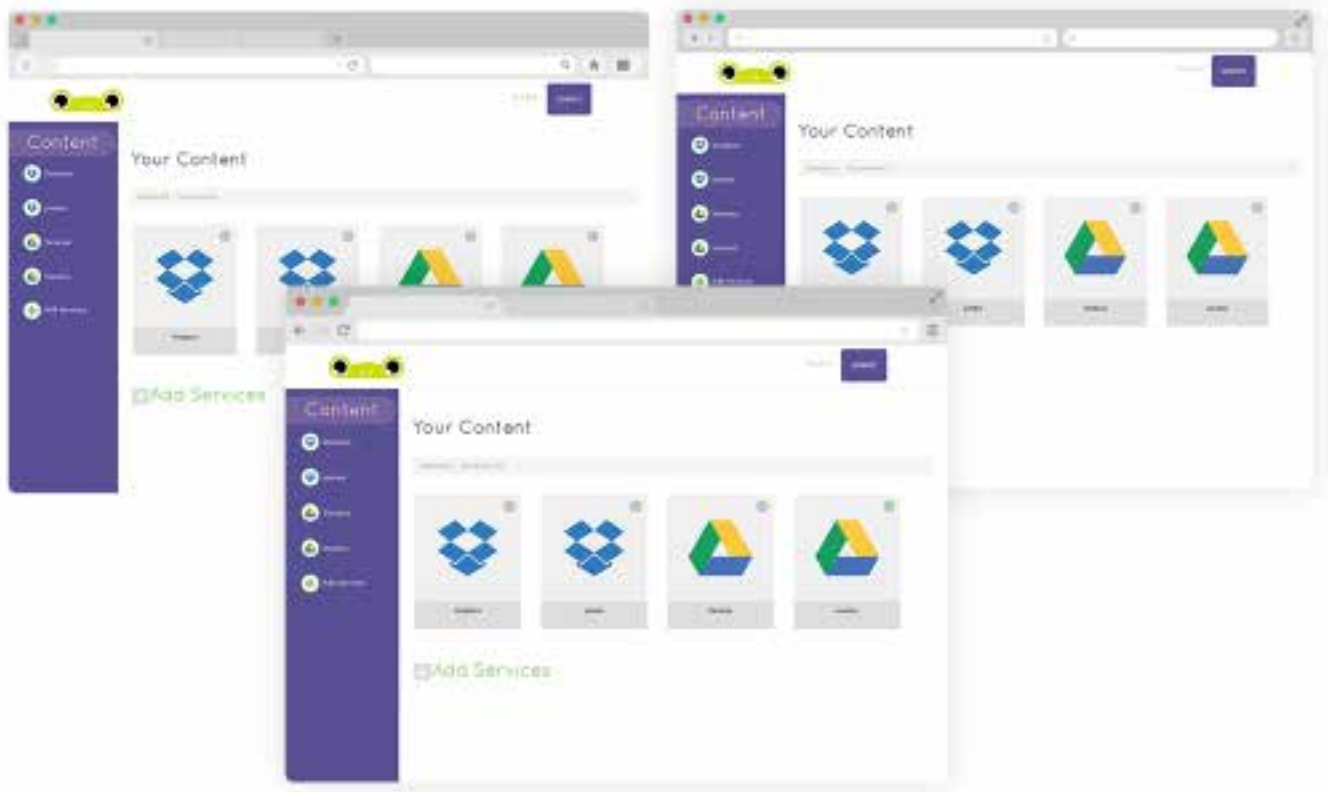

Select Delete Action

Once you have selected the files, click on Delete on the Actions sidebar to delete the files.

View your content in any browser

At Jumpix we feel accessing files should be simple. Jumpix is available in all browsers in both Mac and Windows. Enjoy!

You're all set!

Start using Jumpix now and tell us what you think by sending us an email at feedback@jumpix.com.

SYNC

COMING SOON.

Want to synchronize files between Dropbox to Box or Facebook Google? So do we.
